

CITIZEN CHARTER

VISION

Sustainable growth of livestock for ensuring nutritional security, creation of employment opportunities and economic prosperity of the Union Territory.

MISSION

Genetic up-gradation of local livestock to strengthen and improve livestock productivity and ensure a disease free livestock product supply chain for the Union Territory.

OBJECTIVES

1. Genetic up-gradation of livestock with improved/exotic germ plasm is the main activity associated with genetic up-gradation by natural service in small ruminants.
2. Development of Sheep sector by laying emphasis on increasing mutton production and at the same time stabilizing gains achieved in fine wool production through appropriate selection and breeding methods.
3. Safeguarding the uniqueness of genetic resources in Goat Sector by following the policy which is conducive to augmentation of quality Chevon through appropriate breeding technologies.
4. Prevention and Control of animal diseases through intensive vaccination of livestock with the ultimate goal to ensure a healthy society and production of disease free livestock products.
5. To ensure survival and propagation of minor livestock species and domestic farm species of specific importance to certain areas.
6. Development of Feed and Fodder resources in order to realize the true potential of the improved cross bred livestock.
